ESPP Capstone Experience Project Application

The Capstone Experience (3 credits) may involve taking a course or working in another collaborative setting. Key elements are interdisciplinarity, policy-relevance, and collaboration/teamwork. Students must complete ESP 804 (or its substitute course, FW 868, Water Policy and Management) or complete a capstone experience project which results in a co-authored, interdisciplinary, policy-relevant product such as a whitepaper, a report, or a publication. For the capstone experience project, students must meet regularly with supervisory faculty and among the collaborative students.

If you decide to pursue a capstone experience project, please submit a proposal (up to three pages) describing the project you intend to engage in, your role in the project, activities you will undertake, the expected output and outcomes, and the timeline, among others. Please emphasize how the experience involves collaboration and policy experience.

Submit this application and your proposal to espp@msu.edu with the subject line “Capstone Project Proposal”.
